

**March 7–March 11, 2005**

## JIN Data Exchange (JINDEX)

I received the final version of the *Baseline Requirements* document. It may be accessed as an attachment to my monthly report, which I sent to be posted to the JIN web site today. We are scheduled to have an implementation plan by the end of the month, although today's announcement that the Project leader from OBS has accepted a job in Paris (imagine choosing Paris over Olympia!) may cause some delay. Thankfully, as we move deeper into implementation and coding, the focus of the project becomes increasingly technical in nature.

## Summary Offender Profile (SOP)

The connectivity problems with AOC continue. DIS is "sniffing" the network and Templar is investigating possible application problems, which appear the most likely candidate.

## Electronic Citations

HB 1650 and SB 5627, the bills to eliminate the requirement that officers collect signatures when issuing citations, continue to move sluggishly through the process. After amendments suggested by the Association of Cities were incorporated (preserving the requirement that signatures are gathered for paper tickets), the bills are respectively on the House floor and in the Senate Rules Committee. Representative Darneille offered a striker amendment to the House bill on Thursday articulating the right of the accused to challenge identification at a hearing. At this time, everyone appears to find this change acceptable except WASPC, and we have not had a chance to hear their position.

On the operations side, I am planning to issue a request for proposals on March 21 to design the architecture for electronic citations and automate the Law Enforcement→Courts→Department of Licensing exchange, using the Law Enforcement Support Agency (LESA) as a pilot. This project will help to validate the JINDEX model and will create a second service using the JINDEX platform.

## Grants

The applications for 2005 Federal JAG and NCHIP grants are in and have been distributed to the Technical Advisory Group (TAG) for review. I received a late application today from WSP for the acquisition of additional LiveScan equipment for various sites around the state, at a cost of \$896,000. The total amount available is \$987,000. Although OFM has not told me how much of this will be used for administrative expenses, last year's [budget](#) was \$80,000. The applications are as follows:

Requestor	Proposal	Budget
King County	Warrants Look-up	\$187,137
JIN Program Office	JINDEX Services <ul style="list-style-type: none"><li>• Add ACCESS queries to JINDEX</li><li>• XML Incident Report</li><li>• Add DOL photos to JINDEX</li><li>• DAPS feasibility study</li></ul>	\$350,000
WSP	Live Scan	\$896,000
<b>TOTAL REQUESTS</b>		<b>\$1,433,137</b>

The TAG will pass recommendations to the Board at the March meeting.
